DRILL BITS FOR THE CONSTRUCTION INDUSTRY

SAMARA | RUSSIA

DRILL BITS FOR THE CONSTRUCTION INDUSTRY

OUR MISSION

WE ENGINEER QUALITY COST-EFFECTIVE PRODUCTS AND PROVIDE INDUSTRY LEADING RELIABILITY OF SUPPLY.

OUR VISION

WE AIM TO PROVIDE OUR PARTNERS **ALL OVER THE WORLD** WITH SUPERIOR **INNOVATIONS** — RELIABLE PRODUCTS AND ENGINEERING COMPETENCE, MEETING SPECIFIC REQUIREMENTS FOR **GREAT RESULTS**.

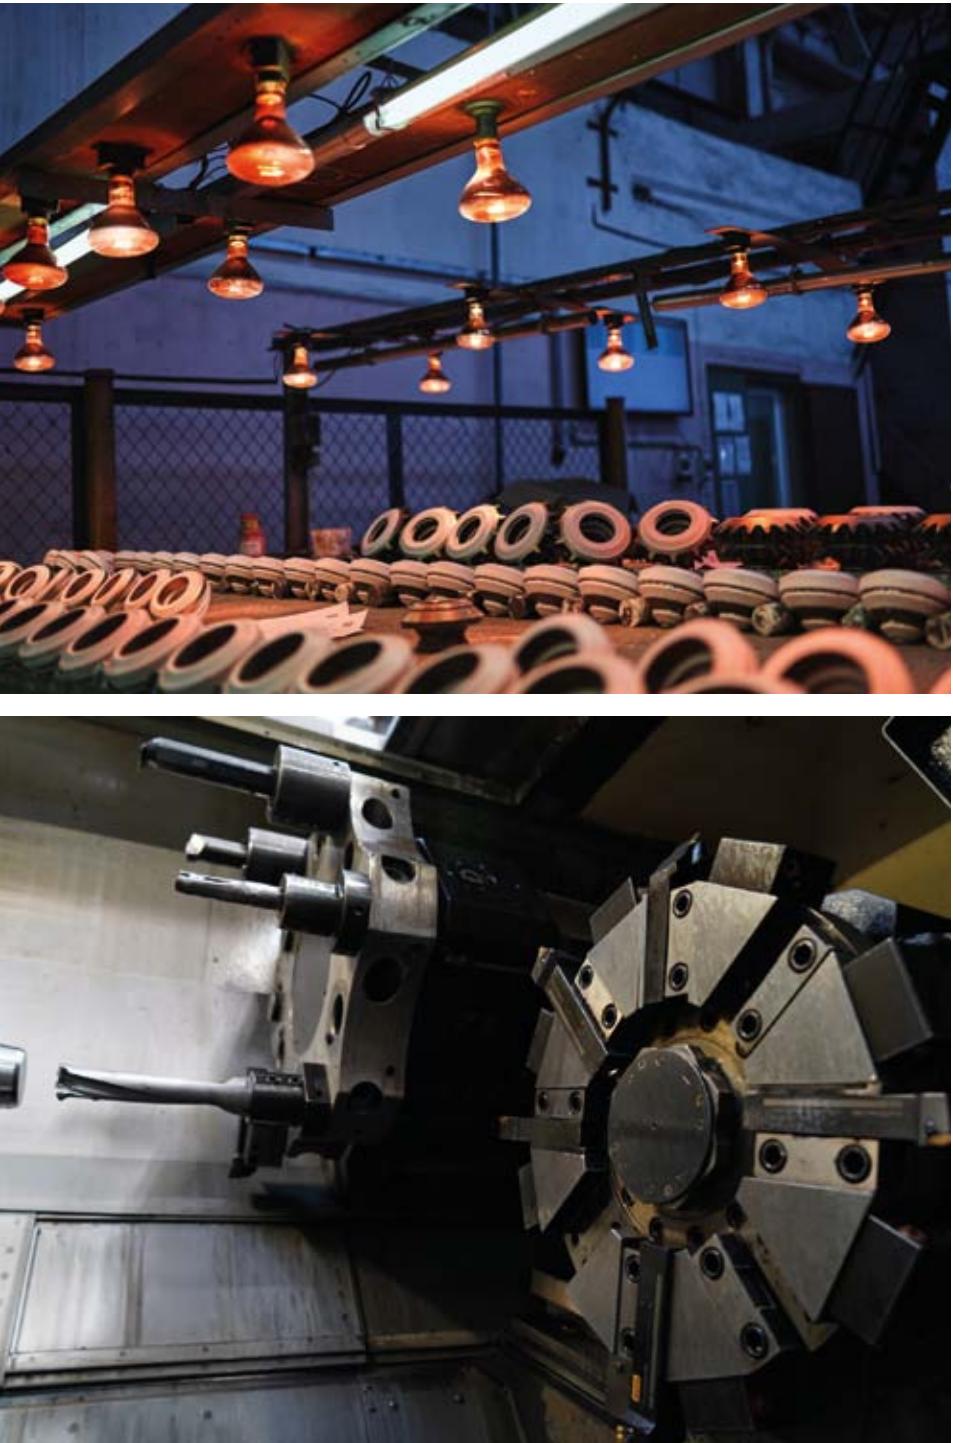

We successfully transform our expertise, manufacturing capacities and skills into your achievements:

- VBM drill bits are used in 75+ countries and across continents;
- VBM is ranked among the TOP-10 of world producers of drilling tools in terms of production quality and turnover;
- VBM factory produces drill bits for the oil and gas, mining, water well and construction industries;
- VBM offers customized bit design and manufacturing;
- VBM's highly qualified personnel and the most up to date production digitization techniques enable continuously improving drill bit development and ensure production quality compliance with the highest world standards.

ABOUT THE COMPANY

Volgaburmash JSC (VBM) is the largest manufacturer in Russia of high-quality rock cutting tools for the oil and gas, mining, water well and construction industries.

It specializes in the production of an extensive range of drill bits which are successfully exported and utilized in over 75 countries.

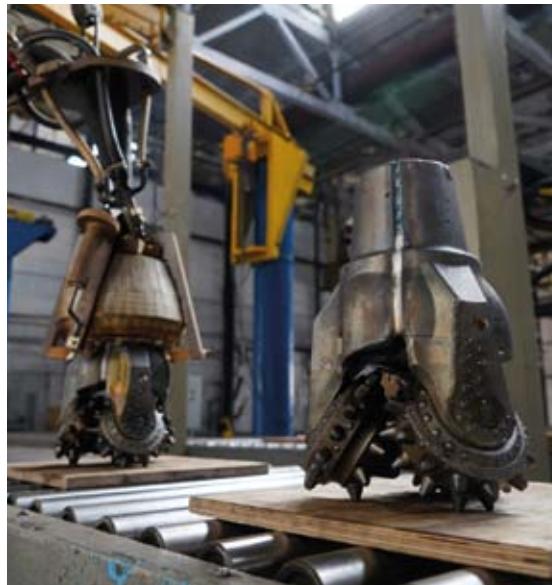

ABOUT THE COMPANY

VOLGABURMASH PRODUCES:

- over 600 roller cone bit designs from 3 3/4" up to 26" (95.3 - 660.4 mm) in diameter with milled tooth and tungsten carbide inserts (TCI) for drilling boreholes in different geological conditions;
- over 350 PDC bit designs from 3" to 17 1/2" (76 - 444.5 mm) in diameter with matrix or steel bodies;
- DTH bits, core bits and other rock cutting tools.

ABOUT THE COMPANY

VBM was established in the industrial, but picturesque Volga region, where all seasons are full of colors and natural beauty.

We actively encourage visits to our factory to inspect the industry leading manufacturing practices and of course to take advantage of the local Samara countryside.

**WELCOME TO SAMARA
AND VOLGABURMASH JSC!**

QUALITY

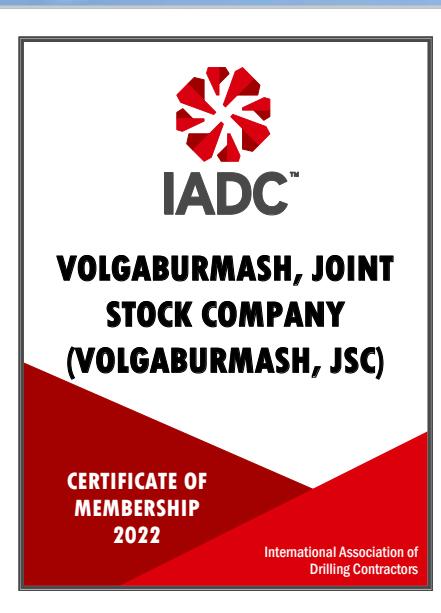

Volgaburmash JSC has a long history of Quality Management System (QMS) certification for compliance with ISO 9001 and API Spec. Q1.

In May 2023 VBM successfully passed the QMS certification audit in accordance with:

- GOST R ISO 9001-2015 (ISO 9001:2015)
- INTI S.QS.1-2020 (it's a QMS standard developed by the Russian Institute of Oil and Gas Technological Initiatives as an alternative to API Q1 9th Edition).

VBM products comply with the requirements of the Technical regulations of the Customs Union, as well as the state standards GOST 20692 and GOST 26474. In addition to that, all of the API Spec. 7-1 requirements are built into our design, development and manufacturing processes.

According to the Quality Policy, our organization's priority is to 'Meet customer's requirements and expectations'. Key aspects of the Policy implementation are:

- maintaining an advanced communication system as well as establishing long-term and mutually beneficial cooperation with our business-partners;
- improving the design solutions;
- monitoring the quality of manufacturing processes;
- ensuring a high level of competence of employees;
- continuous improvement of the quality management system effectiveness;
- compliance with legal requirements, the requirements of national and international standards and specifications, customer requirements, as well as the internal requirements of the organization.

QUALITY

VBM drill tools are certified in compliance with the Technical Regulations of the Customs Union, and meet the State Standards GOST 20692 and GOST 26474. VBM's certified Quality Management System regulates all aspects from contracts analysis to shipment of finished goods to the Customer. Special attention is paid to Customer's satisfaction evaluation and continuous improvement.

Quality control is deeply embedded into processes throughout the entire manufacturing cycle to guarantee uncompromised output quality.

All raw materials and components are subject to thorough incoming inspection in the Central Plant Laboratory. Conformance to all the requirements is mandatory for release into production.

Prior to the final assembly a multistage inspection is performed with respect to the relevant design and engineering specifications requirements. Finished goods are admitted to the warehouse upon successful completion of special control performed by highly qualified inspectors.

Measuring and control instruments are calibrated initially and periodically to ensure the uniformity and required accuracy of measurements.

Due to the integrated approach to quality, VBM drilling equipment fully complies with international and local standards as well as customer's requirements and expectations.

DRILLING TOOLS FOR THE CONSTRUCTION INDUSTRY

Advanced technologies and software applied for the hi-tech oil and gas industry are also used for designing and manufacturing special bits utilized for the construction, HDD and water well industries. This allows us to offer our customers excellent tools, which proved their high efficiency in various projects all over the world. Volgaburmash produces for the construction industry:

Roller cone bits

- TechnoPro (TCNP)
- HorizontalDirectionalDrilling (HDD)
- Standard (STD)

PDC bits

- WaterDrill (WD)
- ReverseCirculationBit (RCB)

Segments and sets of segments

BIT STAMPING

This information is marked at the pin/box face of every VBM drill bit:

- company trade mark (vbm)
- bit notation key
- serial number
- thread type
- inspection stamp

ROLLER CONE BITS

Three product lines of VBM roller cone bits are suitable for construction, HDD and water well drilling:

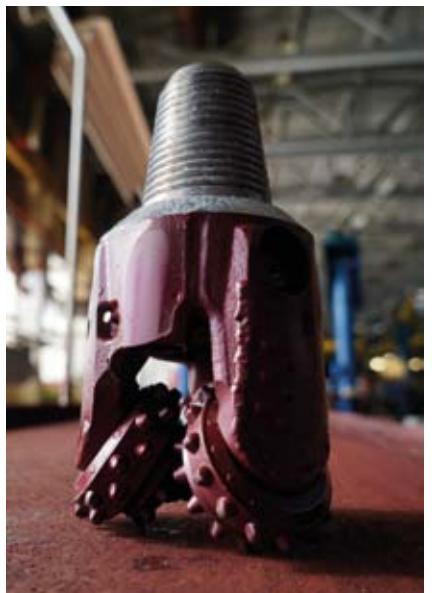

TechnoPro (TCNP)	used for directional drilling, water well drilling and well drilling in construction
Horizontal Directional Drilling (HDD)	designed for horizontal directional drilling (HDD)
Standard (STD)	used for water well drilling, service well drilling and well drilling in construction

TechnoPro	Horizontal Directional Drilling	Standard
<ul style="list-style-type: none"> improved design roller bearing sealed roller bearing made of high quality materials side jet or four jets (for bit size of 295.3 mm or over) 	<ul style="list-style-type: none"> resource-intensive design journal bearing sealed journal bearing made of wear-resistant materials side jet hardfaced shirttail for safe and reliable performance while horizontal directional drilling 	<ul style="list-style-type: none"> simple design open roller bearing central jet, side jet or four jets steel teeth or tungsten carbide inserts

PDC BITS

Two product lines of bits with polycrystalline diamond cutters (PDC) are offered by VBM for construction needs and water well drilling:

WaterDrill (WD)

- designed especially for the construction industry
- utilized in the complicated geological conditions
- used for construction drilling and water well drilling
- suitable for geothermal drilling

ReverseCirculationBit (RCB)

- applied for reverse circulation drilling in different formations

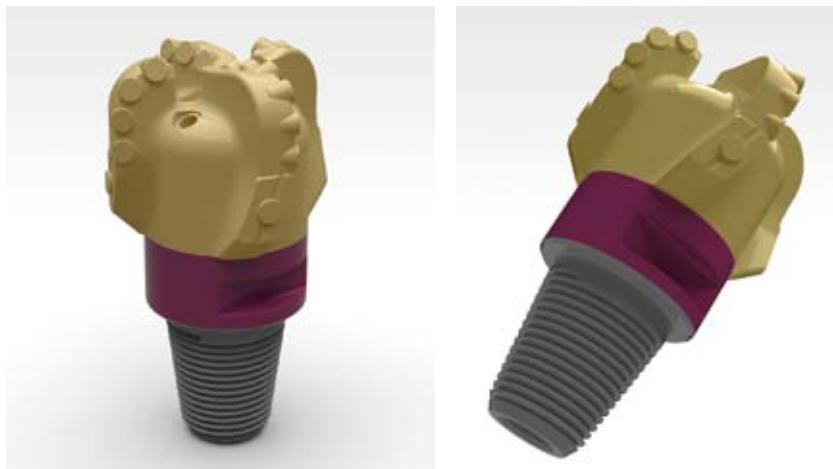

WaterDrill (WD)

- simple design, low cost, high capacity
- steel body, wear-resistant PDC inserts
- cut-out ports or stationary/replaceable nozzles are used for water flush
- flushing through ports directed towards the well bottom efficiently cleans the hole and cools the bit

ReverseCirculationBit (RCB)

- steel body, wear-resistant PDC inserts
- large flushing ports which allow more cuttings to pass easily into the drill string

PDC BITS WATERDRILL (WD)

SEGMENTS AND SETS OF SEGMENTS

Drill bit segments or sets of segments are used for manufacturing different types of well reamers for operations in any strata with water or mud flush.
